Specification Sheet

*PATENT PENDING

INDICATIONS

Vac-Pac Plus™ new generation stabilizer aids in the administration of vaccines for poultry. It is especially designed to prolong the viability and improve the effectiveness of reconstituted and diluted vaccines.

ADVANTAGES

- More concentrated formula means added convenience and less handling
- Faster wetting and improved solubility results in less time spent mixing vaccine
- Activates immediately to rescue vaccine from the harmful effects of tap water, no waiting required
- Rich blue dye provides visual assurance that the stabilizer has been added, properly mixed, and is visible at the drinker
- Specially engineered to preserve the livability of mixed vaccine and sustain effectiveness over longer vaccination times
- Will not clog drinkers

CAUTION

Not for spray, aerosol, or injectable vaccine application. This product is specifically formulated for water administration only.

Store in a cool, dry place

WARNING

Keep out of reach of children

Not for human consumption

PACKAGING

Net contents 18.75 lb (8.5 Kg) in
75 x 4 ounce (113.4 gram) packages

DIRECTIONS FOR USE

Before diluting vaccine in the stock solution, prepare the water by adding Vac-Pac Plus™ according to the directions below.

Dissolve 1 pack (4 oz, or 113.4 g) of Vac-Pac Plus™ into each 2 gallons (7.6 liters) of stock solution to be metered at 1 oz/gal (1:128 proportioner). One pack stabilizes 256 gallons (969 liters) of drinking water.

Uniform distribution of the blue dye in the stock solution assures the stabilizer is thoroughly mixed, and the stock solution is immediately safe and ready to receive the vaccine

Mix the vaccine into the stock solution according to the manufacturer's directions.
