Specification Sheet

PATENT PENDING

INDICATIONS

Vac-Pac™ new generation stabilizer aids in the administration of vaccines for poultry. It is especially designed to prolong the viability and improve the effectiveness of reconstituted and diluted vaccines.

ADVANTAGES

- More concentrated formula means added convenience and less handling
- Faster wetting and improved solubility results in less time spent mixing vaccine
- Activates immediately to rescue vaccine from the harmful effects of tap water, no waiting required
- Pink dye provides visual assurance that the stabilizer has been added and properly mixed
- Specially engineered to preserve the livability of mixed vaccine and sustain effectiveness over longer vaccination times
- Will not clog drinkers

CAUTION

Not for spray, aerosol, or injectable vaccine application. This product is specifically formulated for water administration only.

Store in a cool, dry place

WARNING

Keep out of reach of children.

Not for human consumption.

PACKAGING

Net contents 18.75 lb (8.5 Kg) in
75 x 4 ounce (113.4 gram) packages

DIRECTIONS FOR USE

Before diluting vaccine in the stock solution, prepare the water by adding Vac-Pac™ according to the directions below.

Dissolve 1 pack (4 oz, or 113.4 g) of Vac-Pac™ into each 2 gallons (7.6 liters) of stock solution to be metered at 1 oz/gal (1:128 proportioner). One pack stabilizes 256 gallons (969 liters) of drinking water.

Uniform distribution of the pink dye in the stock solution assures the stabilizer is thoroughly mixed, and the stock solution is immediately safe and ready to receive the vaccine.

Mix the vaccine into the stock solution according to the manufacturer's directions.
