## Preserv™Xtra and Cell-Lution™

**Preserv™Xtra and Cell-Lution™** are truly the next generation of AI media. It's the perfect choice for collection frequencies of 2 days a week or less. It is a suitable choice for any kind of semen shipments.

**Preserv™Xtra and Cell-Lution™** were specifically designed to increase the longevity of the sperm cell by reducing the effects of aging and cellular degeneration. Similar to other species, boar seminal plasma naturally has a built-in antioxidant mechanism that protects the sperm cell from degeneration or cellular breakdown. However, unlike other species boar spermatozoa is highly diluted for use in artificial insemination programs. This not only dilutes the sperm cells but dilutes the seminal plasma and its powerful antioxidant and anti-aging affects. Knowing this, **Preserv™Xtra and Cell-Lution™** was formulated with a powerfull antioxidant to compensate for the lost anti-oxidant effect, thereby increasing the longevity and cellular breakdown.

**Preserv™Xtra and Cell-Lution™** is a non-irritating, non-foaming formulation that contains **NO BSA or animal proteins** and dissolves easily in warm purified water. We recommend a type II or better water for optimal results.

S6-7200                      1 liter (50 grams) packet, 250 per case  
S6-7220                      100 liter, 1 per case

## BTS Extender - Short Term Storage

For the liquid storage of boar semen. Extended with a buffered salt solution and held at temperatures around 15° - 18°C (59° - 65° F). BTS Boar Semen Extender has been proven to be one of the most effective semen extender solutions available. Contains 250 mg gentamycin sulphate per liter.

S6-7000                      1 liter (46 grams) package, 250 per case  
S6-7020                      100 liter, 4 per case

## Foam Catheters

The soft foam facilitates entering the reproductive tract with minimum risk of entering the urethra. Soft foam provides for an excellent lock in the cervix. The shaft is recessed to protect mucous membranes.

25 catheters per pack, 500 catheters per case

S6-5125                      Classic Blue™  
S6-5122                      Complete Blue™  
S6-5158                      Classic Blue™ with attached handle

S6-5153

Complete Blue™ with attached handle

### White Spiral Tip Catheter

A molded Melrose-style spiral tip allows insertion without damage to the reproductive tract. The spiral tip is made of a high quality thermoplastic rubber.

25 catheters per pack, 500 catheters per case

S6-5118 White Tip Spiral Catheter, 22" tube length without handle

S6-5155 White Tip Spiral Catheter, 22" tube length with handle

### Catheter Handles

Fits all spiral and foam catheters.

25 per poly bag

S6-5116 Catheter Handles

### Con-Quest Breeder Bag™

The **Con-Quest Breeder Bag™** takes semen bag packaging design to the next level by offering features not found on current encapsulated tip bags.

First, the **Con-Quest Breeder Bag™** features a longer spout than other encapsulated tip bags. The increased spout length insures a deeper and better lock onto the catheter when inserted for insemination. By locking deeper into the catheter there are fewer "pop-outs" and lost doses are greatly reduced.

Second, the **Con-Quest Breeder Bag™** features a Twist-Off (Resealable) Tip a feature not offered with encapsulated tip bags. Once opened the tip can be used as a cap to reseal the dose. This feature is especially handy if you need to check dose motility on-farm prior to breeding.

S6-8500 **Con-Quest Breeder Bag™**

### Eco-Tip Semen Tube™

The Eco-Tip Semen Tube is made from super-thin, soft, flexible material. This ensures that the tube will collapse during insemination due to the uterine contractions of the sow and makes it unnecessary to apply pressure to the tube (squeezing) or to open a hole in the tube to allow air inside during insemination. The consistent tube wall thickness facilitates better sealing.

The end is an easy twist-off that allows it to be opened without the use of tools. After opening, the tip stays attached to the tube body without interfering with attachment to the insemination catheter. This prevents the tip from contaminating the pit and subsequently the environment. A larger spout opening and slight spout taper means the tube will fit more tightly into the catheter than competing brands and allows for better semen flow during insemination. Textured sides make the tubes separate easily from the stack when used in automated filling machines (less incidence of two tubes getting stuck together).

The tubes are available in 7 colors. This tube is suitable for use in all manual filling stations and automated machines.

### EZ-Catch Hog Snare

S6-6000

The fastest, simplest way to control a hog for injection, inspection, clipping, or other treatment. The snare operates easily and holds securely using only one hand, leaving the other hand free to administer treatment. This US-made snare is very sturdy and dependable. No other snare can compare!

### Magnetic Tube Sealer

Seals 6 tubes in a stainless steel rack (rack pictured at right). Does not require air compressor for use.

- S6-8264 Magnetic Tube Sealer - One semen tube rack included
- S6-8236 Semen tube rack, holds 6 tubes, sold individually

### Big Mouth® Bottle

Extremely soft polyethylene bottle graduated 10-90 ml. Labels and pen markings adhere. Two-Part Cap (spout and collar) makes for a leak-proof bottle.

- S6-6500 Bottle without cap, 250 per case
- S6-6501 Collar, 250 per poly bag, 10 bags per case
- S6-6502 Spouts, Natural/Clear color, 250 per bag, 10 bags per case
- S6-6400 Cutters for Spout

### Gallon Dispensing Bag

For dispensing extended boar semen into bottles or tubes. Ideal reservoir for dispensing pooled semen. Bags hold up to one gallon (3.7 liters) of extended semen. Double-ply, leak-proof and resealable.

- S6-6530 One gallon bag, 20 per bag, 5 bags per case
- S6-6532 Dispensing bag spout, 20 per bag, 5 bags per case
- S6-8236 Semen tube rack, holds 6 tubes, sold individually

### Vinyl Collection Gloves

Exceptionally soft and durable, Glove Plus® Powder Free Vinyl gloves have been called "the most popular collection glove" on the market.

100 gloves per dispenser box, 10 boxes per case, 70 cases per skid

Fully Textured, Non-Powdered

B2-1436	Small	B2-1440	Large
B2-1437	Medium	B2-1445	X Large

### Perforated Collection Bags

Disposable plastic bags with a convenient perforation for sanitary disposal of used semen filter. 100 per poly bag, 10 bags per case

S6-6515 28" (71.12 cm) long, 9" (24.13 cm wide) 2 mil

### Semen Filter

Non-spermicidal, fast flow, and excellent gel retention. 200 per zip-lock bag, 10 bags per case

S6-6529 Round filters, 9" (22.86 cm)

### Pooling Bags

Disposable plastic bags manufactured of high quality polyethylene. Ideal for temporary storage of water, extender, pooled semen or for shipping packaged semen. Clear - All 3 mil thickness

S6-6525 8 liter, 14" wide x 22" long (35.56 cm x 55.88 cm), 500 per case. Fits pitcher or water-bath cylinder

S6-6527 12 liter, 16" wide x 22" long (40.64 cm x 55.88 cm), 500 per case. Fits large pitcher or small bucket

S6-6528 18 liter, 24" wide x 24" long (60.96 cm x 60.96 cm), 250 per case. Ideal for 5-gallon buckets

### Transport Bags

Designed especially for packaged semen tubes. Dark color does not allow penetration of UV light.

Black - All 4 mil thickness

S6-6621 5 liter, 12" wide x 20" long (30.48 cm x 50.80 cm), 300 per case

S6-6623 9 liter, 16" wide x 20" long (40.64 cm x 50.80 cm), 300 per case

S6-6622 13 liter, 23" wide x 20" long (58.42 cm x 50.80 cm), 300 per case
